BENTLEY-WITH-ARKSEY URBAN DISTRICT COUNCIL

Public Health Department,

Council Offices,

Bentley.

September, 1971.

To the Chairman and Members of the Council,

Mr. Chairman, Ladies and Gentlemen,

It is again my pleasant duty to present you with an annual report which though following a similar pattern to previous years has been printed differently and is a different size.

During 1970 there has been a gradual change in the work of the divisional health services provided by the West Riding County Council, and we have seen the Social Services Act become law which has had a profound effect on the services provided by the Health Department in 1971. The passing of the Act means that the Home Help Service, Mental Health and duties under the Nurseries and Child Minders legislation became part of the new Social Services Department, as well as the administrative control over the Adwick Training Centre. The Junior Training Centre became part of the Education Department and this transfer should bring more teaching expertise and possibly more research into teaching methods for this group of children. It is unfortunate that the extensions to this badly overcrowded centre and the building of a hostel has been held up for another year because of engineering difficulties.

At the beginning of 1970 an influenza epidemic was raging in the area but the disease was not serious in nature and there were few deaths. It was in February that the problem of environmental pollution was highlighted in the European Conservation Year when many voiced their objections to the building of a Coalite plant on the South side of Doncaster. In this Urban District the problem of smoke pollution has not yet been tackled despite the advantages to health and environment that a smoke control programme can bring. There are understandable reasons for there not being a programme of smoke control in this coal mining area, but when these are resolved there will undoubtedly be a demand for a cleaner atmosphere.

The vital statistics of the Urban District show little change from the previous year and though there were no maternal deaths I was disappointed to note there was a further rise in the infant mortality rate due mainly to a high peri-natal mortality rate. There are many causes of peri-natal death and the Maternity Liaison Committee in the Doncaster area have set up a sub-committee to investigate the high peri-natal death rate with a view to pinpointing causes and perhaps advising on how this high rate can be reduced.

The causes of death are mainly heart disease, vascular lesions of the central nervous system, respiratory disease and cancer among which cancer of the lung shows a steady increase.

During 1970 planned programme of systematic assessment of children in the district was followed and proved to be successful not only by the early detection and treatment of some chronic illness but by the stimulation of interest and increase in knowledge gained by parents of the mental development of their children. These continuous assessments of children are also valuable in helping to plan the future educational needs of the area, and it is already obvious that there will be a need for an assessment unit or clinic attached to a school, and a need for another unit for physically handicapped children.

It is unfortunate that at a time when there is so much progress to be made in preventive medicine that the public health service is so short of trained medical and health visiting staff, though I hope that we shall have a steady recruitment locally for health visitor training.

During 1970 plans were being made to integrate the domiciliary and hospital midwifery service in the Borough of Doncaster, and though this is a step in the right direction there is at present no place to form the domiciliary midwifery service for this area in the same way, for despite an increasing hospital confinement rate there is still sufficient work particularly in ante-natal and relaxation classes to be done. The work of the Family Planning Association has continued to increase in this area and this service will certainly continue to give valuable help and advice to inhabitants of the district.

Finally, I would like to thank you, Mr. Walman, and the Members of the Council for the interest shown in my reports throughout the year and to thank Mr. Hay and the Staff of the Public Health Department, and Mr. Vallance and the Staff of the Divisional Health Department for their support and hard work during the year.

Yours faithfully,

B. Stalker

BENTLEY-WITH-ARKSEY URBAN DISTRICT COUNCIL

60TH ANNUAL REPORT
of the
MEDICAL OFFICER OF HEALTH
1970

Section A

STATISTICS AND SOCIAL CONDITIONS OF THE AREA

Area (acres)	4,956
Registrar General's Estimate of Resident Population Mid Year 1970	23,590
Number of inhabited houses at year end 1970	7,601
Rateable Value	£601,310
Sum represented by a Penny Rate	£2,383

EXTRACTS FROM VITAL STATISTICS
(Corrected for Inward and Outward Returns)

BIRTHS

<u>Live Births</u>	<u>1970</u>	<u>1969</u>
Total Number	389	389
Birth Rate per 1,000 population	16.5	16.3
Birth Rate per 1,000 population (corrected)	15.5	15.3
Birth Rate for England and Wales	16.0	16.3
Percentage Illegitimate Live Births per total		
Live Births	11.0	11.0

	<u>Males</u>	<u>Females</u>	<u>Total</u>
Legitimate	174	174	348
Illegitimate	19	22	41
	<hr/>	<hr/>	<hr/>
	193	196	389
	<hr/>	<hr/>	<hr/>

<u>Still Births</u>	<u>1970</u>	<u>1969</u>
Total Number	3	2
Rate per 1,000 total live and still Births	8.0	5.0
Rate for England and Wales	13.0	13.0

	<u>Males</u>	<u>Females</u>	<u>Total</u>
Legitimate	—	2	2
Illegitimate	—	1	1
	<hr/>	<hr/>	<hr/>
	—	3	3
	<hr/>	<hr/>	<hr/>

<u>Total Live and Still Births</u>	<u>1970</u>	<u>1969</u>
Total Number Births (Live and Still)	392	391
Rate per 1,000 population	16.6	16.4

	<u>Males</u>	<u>Females</u>	<u>Total</u>
Legitimate	174	176	350
Illegitimate	19	23	42
	<hr/>	<hr/>	<hr/>
	193	199	392
	<hr/>	<hr/>	<hr/>

INFANTILE MORTALITY

The Infantile Mortality Rate is the number of deaths of Infants under one year of age per 1,000 registered births.

	<u>1970</u>	<u>1969</u>
Number of Deaths	14	11
Death Rate of all infants per 1,000 live births ...	36.0	28.3
Death Rate of legitimate infants per 1,000 legitimate live births	34.0	28.3
Death Rate of illegitimate infants per 1,000 illegitimate live births	49.0	23.3
Death Rate for England and Wales	18.0	18.0

There were 14 Infant Deaths during the year compared with 11 in the previous year. Of these Infant Deaths in 1970 there were 9 male and 5 female and half of the deaths occurred in the Neo-Natal period which is in the first month of life. The causes of death were birth injury - 3, congenital abnormalities - 1, and other causes, such as prematurity & respiratory distress. The 5 deaths in the age 1 - 12 months were mainly due to respiratory diseases.

The ages at which death occurred were:-

0 - 24 hours	1 - 7 days	1 - 4 weeks	1 - 12 months
2	6	1	5

NEO-NATAL MORTALITY

The Neo-Natal Mortality Rate is the number of deaths of infants under four weeks of age per 1,000 total live births.

	<u>1970</u>	<u>1969</u>
Number of Deaths	9	7
Death Rate per 1,000 total live births	23.0	18.0
Death Rate for England and Wales	12.0	12.0

EARLY NEO-NATAL MORTALITY

The Early Neo-Natal Mortality Rate is the number of deaths of infants under one week of age per 1,000 total live births.

	<u>1970</u>	<u>1969</u>
Number of Deaths	8	6
Death Rate per 1,000 total live births	21.0	15.0
Death Rate for England and Wales	11.0	10.0

The birth rate in 1970 increased slightly over the birth rate in 1969 but this was only due to the decrease in population in the Urban District, for the total number of live births remained exactly the same. The number of illegitimate live births decreased by 2 but this made little difference to the percentage of illegitimate live births in the total. The birth rate for England and Wales continues to show a downward trend but the Infant Mortality Rate has remained the same like the Neo-Natal Mortality but a slight increase in the Early Neo-Natal Mortality Rate was seen. The Infant Mortality Rate for Bentley looks high compared with the rate for England and Wales but I would emphasise that the figures are small and are well within the normal statistical variations that one is likely to get with these numbers. Once again I am pleased to report that there were no Maternal Deaths, which again shows plainly that child bearing is now a very safe procedure for the mother in the Doncaster area.

MATERNAL DEATHS

	<u>1970</u>	<u>1969</u>
Maternal Deaths (including abortion)	-	-
Death Rate per 1,000 Live and Still Births	-	-
England and Wales	0.18	0.19

DEATHS

	<u>1970</u>	<u>1969</u>
Total Number	258	242
Death Rate per 1,000 population (crude)	10.9	10.2
Death Rate per 1,000 population (corrected)	14.8	13.8
Death Rate for England and Wales	11.7	11.9

	<u>Males</u>	<u>Females</u>	<u>Total</u>
Total Deaths (All causes)	134	124	258

DEATHS FROM ROAD ACCIDENTS AND OTHER VIOLENT CAUSES

There were during the year three deaths caused by motor vehicle accidents and nine deaths attributed to other accidents and four suicides. These figures are an increase on the figures for 1969 but there has been a reduction in the motor vehicle accidents. It is unfortunate to note that the number of suicides have increased for in most cases this cause of death is preventable.

The number of deaths increased slightly for the second successive year and once again heart disease and vascular disease of the central nervous system topped the list. A further rise in the deaths from cancer of the lung and no decrease in the deaths from other respiratory diseases once again emphasises the proven dangers of cigarette smoking and air pollution, particular smoke as the cause of so much respiratory illness in a community.

On looking at the causes of death I usually consider how many deaths could have been prevented and the part a preventive health service can play in a future national health service, by preventing deaths from such diseases as cancer of the lung, breast and uterus as well as deaths from accidents. There is undoubtedly a greater need for public education and exhortation, particularly if deaths from these disease are to be reduced. The benefits which can be derived from a policy of smoke control can be easily seen and the medical profession itself has clearly shown how cancer of the lung can be reduced by the reduction in the amount of tobacco consumed, particularly in the form of cigarettes. Recently a survey in Aberdeen showed that cancer of the womb can also be reduced by an enthusiastic cervical cytology scheme allied to a policy of breast examination, but the success of such a scheme depends to a large extent on how much co-operation can be obtained from the public. There were this year no deaths from Tuberculosis of the respiratory system.

COMPARATIVE TABLES

Year	Population	Birth Rate	Death Rate Corrected	Infantile Mortality Rate
1911	6,650	33.08	10.09	122.7
1920	13,001	31.9	9.5	90.9
1930	16,320	19.1	9.4	95.8
1940	18,070	17.32	12.73	38.3
1950	19,990	16.96	13.17	53.09
1951	19,740	18.74	14.70	43.24
1952	19,630	16.45	11.69	46.44
1953	19,900	17.04	11.80	41.00
1954	20,170	17.69	13.57	33.61
1955	21,430	21.88	12.82	14.93
1956	21,630	20.64	15.09	42.10
1957	21,710	20.91	14.40	33.04
1958	21,880	20.43	14.07	31.32
1959	22,100	19.59	13.14	30.02
1960	22,320	21.6	12.82	18.71
1961	22,980	20.5	14.38	29.7
1962	23,160	21.8	14.5	23.8
1963	23,310	22.1	15.8	50.6
1964	23,400	21.5	13.4	21.9
1965	23,420	21.8	13.2	39.2
1966	23,510	19.4	13.5	24.1
1967	23,650	19.9	12.8	21.2
1968	23,860	17.4	12.3	28.7
1969	23,810	16.3	13.8	28.3
1970	23,590	16.5	14.8	36.0

COMPARATIVE VITAL STATISTICS FOR THE YEAR 1970

The following table shows a comparison between the Authority's vital statistics and those of the W.R.C.C. Urban Authorities, the West Riding as a Whole, and England and Wales as a whole.

Based on the Registrar General's figures

	Bentley with Arksey Urban District	Aggregate West Riding Urban Districts	West Riding Admin. County	England and Wales
Live Birth Rate	16.5	17.2	17.3	16.0
Live Birth Rate Corrected	15.5	17.6	17.5	.
Death Rate - All Causes	10.9	12.5	11.7	11.7
Death Rate - All Causes (Corrected)	14.9	13.0	12.7	
Tuberculosis:				
Respiratory	-	0.02	0.02	0.02
Other Forms	-	0.01	0.01	0.01
All Forms	-	0.03	0.03	0.03
Cancer of Lungs & Bronchus	0.55	0.52	0.50	0.62
Cancer of Uterus	0.25	0.11	0.09	/
Cancer - All Forms	2.16	2.29	2.14	2.39
Cerebrovascular Diseases	1.36	1.89	1.75	/
Circulatory Diseases excluding Cerebrovascular Diseases	4.07	4.76	4.44	/
Respiratory Diseases	1.74	1.82	1.69	/
Maternal Mortality	-	0.36	0.29	0.18
Stillbirths	7.7	13.3	13.6	13.0
Perinatal Mortality	28.1	24.1	24.4	23.5
Neonatal Mortality	23.1	13.2	13.2	12.3
Infant Mortality	36.0	19.5	19.8	18.2
/ Figures not available				

All the Maternal Mortality, Stillbirths and Perinatal Mortality Rates are per 1,000 live and Still births.

Respiratory Diseases - combined Death Rate from Influenza, Pneumonia, Bronchitis and Other Diseases of Respiratory System excluding Tuberculosis.

The above figures for Bentley can be seen to compare reasonably well with the aggregate of the West Riding Urban Districts but the Infant Mortality Rate and the Neo-Natal Mortality Rates remain as they did last year, higher than the figures for the other districts and those for England and Wales.

Section B

SERVICES PROVIDED BY LOCAL HEALTH AUTHORITY

1. CHILD WELFARE SERVICE AND HEALTH VISITING SERVICE

(a) Clinics

- (i) Pavilion, Wednesday 10.00 a.m. to 4.00 p.m.
(ii) W.R.C.C. Clinic, Scawthorpe, Tuesday 10.00 a.m. to 4.00 p.m.

No. of Attendances:-

	Bentley	Scawthorpe	Total
(a) Children under 1 year	2,129	1,185	3,314
(b) Children 1 - 5 years	2,957	2,570	5,527

No. of children attended:-

(a) Under 1 year	247	107	354
(b) 1 - 5 years	362	543	905

Total No. of Sessions	104	97	201
-----------------------	-----	----	-----

(b) Home Visits

(Health Visiting and Tuberculosis Visiting)

	No. of Cases (i.e. First visits)
1. Children born in 1970	368
2. Children born in 1969	339
3. Children born in 1968 - 65	707
Total No. children visited	1,414
4. Persons aged 65 and over (excluding "domestic help" only visits)	125
5. Mentally disordered persons	12
6. Persons, excluding maternity cases, discharged from hospital (other than mental hospitals)	21
7. No. of Tuberculosis households visited by Health Visitors	46
8. No. of households visited on account of infectious diseases	2
9. Expectant Mothers	40
10. Home Help Visits	-
11. Other visits	142

The number of children attending the two clinics in Bentley and Scawthorne showed an overall increase, for the number of children under one year attending the clinics remained the same. The increase in the attendances of children between 1 and 5 years has been due mainly to the policy introduced in this Division on carrying out developmental assessment in children at regular intervals during their pre-school life. At the end of 1970 the policy of paediatric assessments was being carried out in all Divisions of the West Riding. These assessments not only provide the health visitor with a better tool to use in the supervision of children but have the effect of creating an interest in the mothers of their children's natural development.

The clinic at Scawthorpe is a purpose built building but in Bentley, which is an extremely busy clinic, the Pavilion is still used as a temporary premises rented by the County Council. This building is far from ideal and has proved to be inconvenient for many of the activities which normally take place in clinics such as ante-natal and relaxation work and cervical cytology.

Unfortunately during the year negotiations to build a health centre in the Bentley area were not successful but I can only hope that a purpose built clinic will be planned which could later be extended to fulfill the role satisfactorily as Health Centre.

(3) Phenylketonuria Testing

At the 1st of April, 1970 the Guthrie test for phenylketonuria was started in this area. This test is carried out on the infant by the midwife taking a sample of blood from the infant's heel. The samples are sent to Middlewood Hospital from all areas in the Sheffield region, and results are notified to the Divisional Offices rapidly. It is hoped that the early detection of phenylketonuria will enable a child to develop normally instead of becoming mentally handicapped.

(4) Distribution of Welfare Foods

National Dried Milk, Cod Liver Oil, Orange Juice and Vitamin Tablets were supplied to mothers at all clinics and sales have increased.

Details of time and place of sale are appended.

Scawthorpe	- Tuesday	10.00 a.m. - 4.00 p.m.
Bentley	- Wednesday	10.00 a.m. - 4.00 p.m.

Sales of Welfare Food for 1970

	National Dried Milk		Orange Juice		Cod Liver Oil		A and D	
	Sold	Free	Sold	Free	Sold	Free	Sold	Free
Bentley	122	7	2,092	3	128	7	168	-
Scawthorpe	27	35	1,697	-	91	-	83	-
Total	149	42	3,789	3	219	7	251	-
Divisional Total	1,186	242	27,762	255	1,356	70	1,880	7

There has been an increase in the sales of these foods and a corresponding decrease in the allocation of free welfare foods. This serves to remind us that in this "affluent society" there are still families living in real poverty.

2. MATERNITY SERVICE

(a) Clinics

Ante Natal clinics are held weekly in the area. The midwives hold relaxation and preparation for labour classes and also attend the general practitioners' session for ante natal supervision.

The attendances at the clinic for the year 1970 are given below:-

Bentley

1. Total attendances:-

(a)	Ante Natal	160
(b)	Post Natal	-
(c)	Relaxation Classes	259

2. No. of individual women who attended:-

(a)	Ante Natal	39
(b)	Post Natal	-
(c)	Relaxation Classes	87

(b) Midwives

There is a full complement of midwives in the Division.

Appended are the figures for the year.

BIRTHS

Public Health Act 1936, Section 203

Trilene

	Pethidine Alone	Trilene	
		Alone	With Pethidine
Number of cases where analgesia was administered by County Council Midwives	3	3	3

During the year no Medical Aid Notes requesting the services of a Doctor were issued by a midwife.

(c) Maternity Home Accommodation

During the year the trend towards more hospital confinements, which has been particularly evident since the opening of the new Doncaster Royal Infirmary Maternity Hospital, has continued, for out of 401 children born in the Urban District only 14 were domiciliary confinements. As I have stated in previous reports this trend will almost certainly continue until there is almost one hundred per cent hospital confinement, but I consider that there will always be a need for an adequate domiciliary midwifery service, not only to do the actual deliveries at home but to participate in the essential ante-natal and post-natal care.

During the year negotiations continued to incorporate the Doncaster County Borough midwifery service with the hospital service and at the time of writing this report, incorporation has taken place and the initial teething problems overcome. There is at present no proposals to carry out a similar incorporation of the West Riding Midwifery Service but in view of the impending unification of the health services in 1974 discussions will be taking place on how our comprehensive midwifery service can be administered in the new metropolitan district.

BENTLEY AREA
ANALYSIS OF CASES COMPLETED DURING 1970

SUMMARY OF TOTAL CASES DEALT WITH DURING THE YEAR
i.e. Cases completed during year plus cases still
under treatment on 31st December, 1970

Type of Case	No. of Cases attended by Home Nurses	No. of Visits attended by Home Nurses
Medical	245	5,621
Surgical	107	1,964
Infectious Diseases	1	19
Tuberculosis	4	179
Maternal Complications	6	59
Other	-	-
Total	363	7,811
Patients included above who were aged 65 or over at the time of the first visit	186	5,655
Children included above who were under 5 years of age at the time of the first visit	6	37
Patients included above who have had more than 24 visits during the year	86	6,668

HOME NURSING

The Home Nurses now work under the direction of the general practitioners and have their own times at surgeries for the purpose of dressing wounds and giving injections and other treatments. The closer working relationship between the home nursing services and the general practitioners undoubtedly provides a better service to the patient and diminishes any misunderstanding that can arise when two persons are treating one patient.

The tables show slight increases in the number of cases, though the number of visits are less, particularly in cases of Tuberculosis and Maternal Complications. There has also been a decrease, surprisingly, in the number of referrals by the home nurses to surgical cases but as the amount of day surgery increases at the local hospital I would expect this last figure to increase.

4. HOME HELPS

The equivalent of 87.03 full time Home Helps were employed in the Division, working a total of 181,023 hours and attending cases of whom 1,302 were over 65 years of age.

The figures for Bentley-with-Arksey are given below, together with those for 1969.

	No. of Cases		Hours Employed	
	1970	1969	1970	1969
Maternity	1	1	20	32
Chronic Sick and Tuberculosis under 65 years	26	26	3,097	3,480
Aged 65 years and over..	272	282	33,476	36,617
Others	3	8	491	478
Total	302	317	37,084	40,607

During the year there was a slight reduction in the number of hours worked by home helps in the district. This reduction was seen mainly in the amount of time spent at the aged. Towards the end of the year two assistant home help organisers were appointed and once they have gained some experience in this service they will be invaluable help to the organiser who has been overworked. If this service is to be rationalised and needs fully met, then I consider that greater supervision of the work done by the home helps and a more intensive valuation of need is necessary and this can only be done by properly trained supervisory staff. The amount of time devoted by this service to problem families has in this Division been very small because I consider that a greater effect can be obtained by concentrating services on helping the elderly to maintain their standards.

I would, once again like to pay tribute to the home helps who work extremely hard doing what is frequently a difficult task in sometimes poor conditions. They have proved to be a valuable part of the total care of the elderly which includes special housing, warden services, meals-on-wheels, home nursing and the work of the many voluntary societies.

I regret to state that in April, 1971 the control of the home help service will pass over to the new Social Services Department where I am sure it will prove to be a most valuable part of the new Department, where it will give positive evidence of help in the home situation.

Breakdown of Figures

Classification of Cases	Division 27		Bentley-with-Arksey U.D.C.		Adwick-le-Street U.D.C.		Doncaster R.D.C.		Wickthorpe U.D.C.

WELFARE OF THE AGED

The services are sponsored by the Bentley-with-Lixse, Council and the Committee for the Welfare of the Aged, which consists of members of that Authority together with persons interested in the welfare of the aged. The various services, which are available free to the old people, have been administered from the Public Health Department, and the activities during the year are detailed below.

1. Chiropody Service

	1970	1969
No. of Clinics:-		
Recreation Room, The Homestead	55	53
Recreation Room, Queen's Drive	39	39

No. of Appointments made	16	19
No. of Treatments carried out	14	14
Appointments not Kept	2	5
No. Persons Treated during year	5	6

	No. Treas. in during year		No. Presmen's		No. on list at year end	
	1967	1968	1968	1969	1969	1969
1. Homebound	21	20	18	25	81	90
2. Homebound	1	0	12	22	1	7
3. Homebound	10	114	195	275	68	97

During the year there has been an increase in the number of treatments given to the homebound patients but a decrease in the number of homebound patients. This is obviously easier for a physiotherapist to treat homebound patients than to transport himself and his equipment to homes, and this is essential.

Meals-on-Wheels

Meals-on-Wheels service which was provided by the Home Group was substantially reduced as the meals-on-wheels service increased and was finally phased out on 7th May. During 1968 there was 6,632 meals distributed to approximately 146 persons. Meals are supplied by the New Free House Home for Elderly Persons and are delivered, in a van which was donated by the Magnet Hotel Men's Club, by volunteers recruited locally. Problems arise in finding volunteers, particularly on occasions when they were unable to carry out their duties as volunteers and having to notify the Public Health Department when they were away. This is due to these people who work so hard during the year and play a major part in the success of the meals-on-wheels service.

As well as the meals-on-wheels service the Methodist Church Luncheon Club continues with its valuable service to the Community by providing a total of 100 meals to their luncheon club. This is a service which has been appreciated by the community, permitting them not only to have a nutritious meal but friendship, contact with other people and is a service which will require extension in the next few years.

Homebound Patients

The Homebound

Homebound Patients

During the year there has been frequently in operation during the year to deal with the homebound patients because of the increasing use of disposable equipment. It is necessary to be required and supplemented by the laundry service. The homebound patients have frequently proved a boon to the community.

Homebound Patients

The homebound patients are all in active use and are a valuable asset to the community. The homebound patients at Kirkstone Close and Queen's are all in active use and are a valuable asset to the community. The homebound patients are all in active use and are a valuable asset to the community.

5. Warden Service to the Elderly

This service continued during 1970 and the Wardens have given a high standard of work. The kindness and consideration shown by them to the elderly persons in their care has been quite outstanding.

6. MENTAL HEALTH SERVICE

The three Mental Welfare Officers were increased to four during the year, but as stated in my last report, I still consider this an inadequate number for the population of the area covered, for at present little work in the prevention of mental illness is undertaken. This unfortunately is another service which will pass over to the Social Services Department in April, 1971 despite the close working relationship which is required with the medical profession and the confidential information handled.

During the year 389 cases were referred and 174 were admitted to hospital.

4. Adwick-le-Street Training Centre

During the year the lack of accommodation at this Centre became even more acute and unhappily the extensions which were planned were not able to be started because of technical difficulties. It is hoped that these problems will be overcome and extensions to this Centre provided as soon as possible. There is a particular need at this Centre for a special care unit, as the lack of this particular type of care places an undue burden on parents who are so much in need of some relief.

It is now a fact that the junior wing of this Centre has been transferred to the West Riding Education Department and is now known as Adwick Fernbank Special School and the transfer appears to have been beneficial if only by showing an increase in staff and the appointment of a headmaster with a wide experience in the education of the sub-normal child. The Centre has continued during 1970 to be a most happy place with love and care in evidence.

7. SPEECH THERAPY

During 1970 we had two part-time speech therapists in the Division giving the equivalent of four fifths of a full time speech therapist. Though the quality of staff was high the quantity was quite inadequate for our needs particularly if special care is to be given to the school for the educationally sub-normal and pre-school children.

8. RECUPERATIVE HOME TREATMENT

This scheme continues to be administered by the West Riding County Council and is frequently found to be useful though it is not extensively used in this Division.

9. PROBLEM FAMILIES

The Co-ordinating Committee of which I am the Chairman, met on two occasions during the year but as before most of the work was carried out by small sub-committees composed of officers when a particular case was under discussion. This subject is one which will fall fully into the care of the new Social Services Department in 1971, though undoubtedly the Health Department will continue to play a part in discovering and assisting problem families. Much of the problem in dealing with these families is the inadequacy of the staff to give them the supervision required and this will undoubtedly still be a difficulty in the new Department when formed.

Cases on register 31st December, 1970	36
---------------------------------------	----

10. CERVICAL CYTOLOGY

There was a reduction of clinics held for this purpose in the district during 1970 due to a decrease in the demand for this service. The figures quoted do not show the number of women who have had this smear taken either by their general practitioner or at family planning clinics or hospital out patients. This is a most important service for it has been shown that it can definitely reduce the number of deaths from cancer of the neck of the womb, though as yet there is no evidence that it can reduce the number of deaths from cancer of the breast. The service started in April, 1966 and in April next year we shall be starting the first of the five year recall appointments, and it is hoped that during the year we shall be able to have a three year recall system in use, in order that women will be summoned at regular intervals and thus kept under close supervision.

Cytology - 1970

Scawthorpe	4	83	83	-	-
Post Natal Bentley	-	-	-	-	-
Total	7	130	131	-	1

11. DAY CARE OF CHILDREN UNDER 5 YEARS OF AGE

During the year there was an extension of nursery schools provision in the area, and throughout the Division the enthusiasm for play groups continued. No day nurseries are provided in the Division by the Local Health Authority and it is not anticipated that these will be provided in the near future. The premises registered under the Nurseries and Child Minders Regulations Act of 1948 are given below but the supervision of these premises will also pass over to the new Social Services Department. As can be seen from the list of play groups they are mostly held in church halls and organised by voluntary committees. There is a need in this area to expand these play groups possibly by the provision of a service directly run by the new Department, in order to cater for children from a deprived or inadequate background or where there are special needs.

1. Day Nurseries - National Health Service Act 1946

Nil

2. Nursery Schools and Nursery Classes - Education Act 1944

There are no Nursery Schools in the Division but there are sixteen Nursery Classes at fifteen schools in the area as follows:-

Highfields Junior Mixed and Infants
 Woodlands Infants
 Adwick Washington Infants
 Owston - Skellow Infants
 Carcroft Park Lane Infants
 Bentley New Village Infants
 Bentley Toll Bar Junior Mixed and Infants

Total	5,557	5,554	3

The number of children examined at periodic medical inspections during the year showed a slight decrease from the 1969 figure. This was particularly evident in the 7 - 9 year group and the 10 - 11 year group, where selective medical inspections were continued. More time is certainly being spent on these selective medical inspections on children with problems and more requests were received from teachers asking for advice on particular children. I regret again to state that there is a shortage of trained staff in the Division to cope with the amount of work in this service and because of this shortage we are unable to play our role in health education as much as I would like. The number of children found to be unsatisfactory on physical examination was greatly reduced as was the figure of children recommended for treatment. Difficulties of hearing and vision continue to be by far the largest number of defects detected and the Department continued to do two year assessments of hearing and vision in all pupils in schools. During the year the Department also started to give lectures to the Seawsby Teacher Training College on the aims and objects of the school health service and a short course on first aid instruction for teachers was also given after school hours.

The example set by Dr. Trevor Wright in his comprehensive assessment unit for Handicapped Children in Sheffield is one that I hope will be copied in the near future and certainly there is much to commend in the establishment of an assessment unit linked to a school in this area, where children with particular hearing difficulties can spend a period under the care of a trained teacher and regular supervision of medical and other staff such as speech therapists and education psychologists.

15. SPECIALIST CLINICS

Specialist clinics are held for all children suffering from orthopaedic defects and defective vision.

Appended is a list of such clinics held during the year.

(a) Refraction - Mr. B. A. Marshall and Dr. Aussain

Clinics held at Chequer Road, Doncaster.

No. of Clinics	91
No. of children referred	1,545
No. of children attended	1,062
Glasses prescribed	239
Treatment required	251
Referred for re-examination	824
Referred for operation	4

(b) Orthopaedic - Mr. Maitland Smith

I anticipate that at the end of 1971 when the present Consultant holding this clinic is due to retire, that this special clinic for children will be discontinued, for the numbers are small and can be adequately catered for in the normal paediatric and orthopaedic clinics in the hospital.

Clinics held at the Doncaster Royal Infirmary

No. of Clinics	10
						Pre-School Children	School Children	
No. of individual patients seen by the Consultant, including those continuing attendance from previous year	...					30	34	
No. of above:-								
(a) Referred for operative treatment as short stay cases only				-	3	
(b) Recommended treatment by orthopaedic nurse or physiotherapist:-								
(i) at treatment centres	...					-	1	
(ii) domiciliary			15	7	
(iii) children who continued operative treatment	...					-	-	
Total No. of attendances at Consultant Clinics	45	44	

(c) Paediatric

This specialist clinic ceased at the beginning of 1970, but because of the close association with the Consultant in Doncaster Royal Infirmary there has been if anything an improved service in the care of children, particularly those with handicaps who are in need of special education.

(d) Cleanliness Inspections

These inspections were carried out in all schools in the Division during the year but usually only on request of the staff of comprehensive schools. The figures of children found to be infested during the year continued at the same rate but investigation showed that a large percentage of these infestations are in families, which are then rapidly investigated when a child has been discovered in school and measures taken to ensure that these families as a whole are rid of this problem. There have also been an increase in the number of scabies discovered which, fortunately, respond to treatment in most cases. Some cases required a change of treatment before eradication of the infestation was obtained.

Special Examinations at Divisional Health Office and Child Welfare Clinics

(i) Children

For Absenteeism	39
For Special School	161
For Physical Examination	131
For Child Guidance	21

(g) Child Guidance

The Child Guidance Clinic is held at Woodlands.

No. of Sessions during year	219
Attendances	1,311

	Boys	Girls	Total
No. of new cases	62	36	98
Referred from previous year	99	45	144
Re-opened cases	8	3	11
Discharged or admitted for residential treatment	78	51	129
Cases carried forward ...	91	33	124

This service continued to function under a very heavy case load during the year. The Child Psychiatrist and Educational Psychologist are in the area only two days per week which means that we have less than half a psychiatrist and psychologist to deal with all the children in the Division. The position of psychiatric social worker became vacant during the year and she was replaced by a trained social worker for a trained psychiatric social worker was not available. It is quite obvious that more staff is required for this clinic which should be more central to the Division rather than placed in the Woodlands area.

Section C

SANITARY CIRCUMSTANCES OF THE AREA

WATER

The area is supplied by the Doncaster and District Water Board. The supply is satisfactory, being of good quality, constant and sufficient.

Supplies

Of the 7,601 dwelling houses in the area only one is not connected to the public supply.

RIVERS AND STREAMS

There was no danger from flooding at any time during the year.

SEWERAGE AND SEWAGE DISPOSAL

The only extension to the sewerage scheme are in connection with new housing development. A scheme for the extension of the Sewage Disposal Works is almost complete and the new plant should be in operation early in 1971.

CLOSET ACCOMMODATION AND CESSPOOLS

There was no change in the position during the year. All properties which are within reach of the sewer are connected to the sewerage system.

MUNICIPAL DUSTBIN SCHEME

All dustbins are supplied by the Council. During the year 582 were issued and 12 dustbins were sold.

PUBLIC CLEANSING

This work is done under the direction of the Council's Engineer and Surveyor.

PUBLIC HEALTH INSPECTIONS OF THE DISTRICT

Return made by the Chief Public Health Inspector to the Medical Officer of Health in accordance with Article 25 of the Public Health Officers Regulations 1959.

No. of Inspections	5,495
No. of Complaints received		738
No. of Verbal Notices	258
No. of Informal Notices		94
No. of Statutory Notices		22
No. of Letters and Notices				
outstanding 31st December, 1970				84

Average per month 1969	1.83	10.58	4.50	15.09	0.85

/ Figures not available

SWIMMING BATHS AND POOLS

There is one swimming bath within the district at the Don Valley High School controlled by the Education Authority. There are Pit-Head Baths at the Bentley Colliery.

OFFENSIVE TRADES

Bone Boiler and Fat Extractor ...	1
Rag Store	1

VERMINOUS PREMISES

The following premises were treated for vermin:-

Type of Vermin	Council Properties	Private Properties
Ants	97	45
Bees and Wasps	4	5
Blackclocks	4	18
Cockroaches	-	2
Earwigs	38	3
Flies	1	-
Insects	-	1
Silverfish	2	-
Vermin	1	15
Woodworm	1	-
Woodlice	1	1
Beetles	1	4

SCHOOLS

The school accommodation in the area is as follows:-

5 Infants' Departments
4 Junior Mixed Departments
3 Infants' and Junior Mixed Departments
1 Secondary School
1 Don Valley High School

Defects in school buildings are reported to the Divisional Education Officer.

In all cases of notifiable infectious diseases the Head Teacher is informed of the cases, contacts and period of exclusion.

No schools were closed during the year.

Section D

HOUSING

Houses completed in 1970:-

By Local Authority	-
By Private Enterprise	1

Council houses continue to be allocated in date order of application after certain residential qualifications. Special cases, however, brought forward on health or hardship grounds, were dealt with sympathetically.

MOVEABLE DWELLINGS

There are seven licensed residential sites for 205 vans in the area.

HOUSING ACT 1957 Sections 16 - 17

Four houses on which demolition orders were served in 1969 were demolished.

CLEARANCE AREAS

The re-housing of tenants in Clearance Areas Nos. 2/68 and 3/68 continued at a steady pace during the year, with particular emphasis on Area No. 2/68, the demolition of which is expected early in 1971.

Clearance Area No. 1/70 was confirmed by the Minister of Housing and Local Government and re-housing will commence in the new year.

HOUSING - OVERCROWDING

No action was taken during the year.

Section F

PREVALENCE AND CONTROL OVER INFECTION
AND OTHER DISEASES

The immunisation and vaccination of children against diphtheria, whooping cough, tetanus, poliomyelitis and smallpox in the Division continues at a satisfactorily high level and the central computer used by the West Riding to call children routinely for their immunisation is proving to be effective in raising the level of immunisation throughout the County. Unfortunately for this Division it borders on Doncaster County Borough and Nottinghamshire County Council, and there are difficulties because doctors who have patients in two or more areas are reluctant to have some of their patients on the computer and have to work a separate system for the remainder. This may well be a problem which will be resolved when the unification of the health service takes place. Vaccination against measles does not seem to have been greeted with any great enthusiasm by people or by sections of the medical profession and this is probably due to a long familiarity with this illness, which is accepted as part of growing up. This familiarity should not make us forget that many children have complications of this illness and that vaccination against measles is effective and now has very few side effects which are much less of a risk than the possible complications of the disease.

No serious infectious diseases were notified during the year but once again I would emphasise that this must not be taken as a sign to relax vigilance, and in particular I would emphasise the need to maintain the highest standards in food shops and to ensure that an appropriate rate of stock is carried particularly with frozen foods and other modern packaged foods.

VACCINATION AND IMMUNISATION

Vaccination of persons under age 16 completed during 1970

Over 16	64	82
Total	1,348	124

TUBERCULOSIS

During the year there were no deaths attributed to Pulmonary Tuberculosis.

One case of Pulmonary Tuberculosis was notified compared with eight cases of Pulmonary Tuberculosis in 1969 and one case of Non-Pulmonary Tuberculosis in 1969.

The number of cases on the Tuberculosis Register at the 31st December, 1970, was:-

		<u>1970</u>		<u>1969</u>	
		M	F	M	F
Respiratory	...	28	23	28	26
Other Forms	...	-	4	-	4

Over the County as a whole the number of deaths from Tuberculosis decreased as did the number of Notifications and these can be taken as a sign of success of the policy of contact tracing and the close and prolonged follow-up of patients. In this particular area where coal mining is carried out and the number of persons suffering from pneumoconiosis is high, we can perhaps expect a higher rate of tuberculosis notifications, but this should only encourage us to seek out cases earlier and to ensure that all contacts of cases of tuberculosis have been traced and examined.

Care and After-Care of Tuberculosis and Chest Conditions

A special Committee for this purpose has been established for several years. The Committee consists of lay members and representatives of the Medical Officers of Health in Doncaster and District. Financial assistance is given to the Committee by the West Riding County Council and the Doncaster County Borough.

It has been possible to help many cases with clothing, bedding etc. The Committee carries out most useful work and the advice of the special Health Visitors for Tuberculosis is always available.

On the recommendation of the Consultant Physician, milk is provided free to all active Tuberculosis patients. Details of the action taken under the provisions of this scheme are given below:-

(a)	No. of patients receiving extra nourishment at 31st December, 1969	15
(b)	No. of patients granted extra nourishment during the year	3
(c)	No. of grants discontinued	6
(d)	No. of patients receiving extra nourishment at 31st December, 1970	12
(e)	Total Orders issued 1970	72
